Seal number : NE-182398

II The undersigned certifies that:

- The production plant, which is approved for the local market as well as for export, is under supervision of the competent authority in the country of origin;
- The product described above was produced with vegetable material and without using animal protein [with the exception of protein coming from fish meal made from fresh fish];
- The end product has undergone precautions to avoid recontamination with pathogenic agents after heat treatment;
- The random collected sample of the end product complies with the following standards, which is confirmed by the result of regular routine investigations conducted in the official laboratory.
 - Total bacterial contamination does not exceed 500 thousands of microbial cells in 1 g.
 - Salmonella in 25 g: n = 5, c = 0, m = 0, M = 0
 - Enterobacteriaceae in 1 g: n = 5, c = 2, m = 10, M = 300
 - Sulphite reducing Clostridia = 3000 cfu/g
 - E-coli in 1 g: n = 5, c = 2, m = 100, M = 1000

Where:
- n = number of units comprising the sample
- m = threshold value for the number of bacteria; the result is satisfactory if the number of bacteria in all sample units does not exceed m;
- M = maximum value for the number of bacteria; the result is considered to be unsatisfactory if the number of bacteria in one or more sample units is M or more;
- c = number of sample units the bacterial count of which may be between m and M, the sample is still being considered acceptable if the bacterial count of the other sample units is m or less;

The end product was hygienically packed in new packaging material or in case of dispatch as bulk transport, containers or any other means of transport were thoroughly cleaned and disinfected;
The end product was stored only in enclosed storage;
